# **1. General Information**

#### 1.1. Legal Information

The contents of this document are provided "as is". Except as required by applicable law, no warranties of any kind are made in relation to the accuracy and reliability or contents of this document, either expressed or implied, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Westermo reserves the right to revise this document or withdraw it at any time without prior notice.

Under no circumstances shall Westermo be responsible for any loss of data or income or any special, incidental, and consequential or indirect damages howsoever caused.

More information about Westermo can be found at www.westermo.com.

#### 1.2. About This Guide

This guide is intended for installation engineers and users of the Westermo products.

It includes information on safety and regulations, a product description, installation instructions and technical specifications.

#### 1.3. Software Tools

Related software tools are available at https://www.westermo.com/support/productsupport.

#### 1.4. License and Copyright for Included FLOSS

This product includes software developed by third parties, including Free/Libre Open Source Software (FLOSS). The specific license terms and copyright associated with the software are included in each software package respectively. Please visit the product web page for more information.

Upon request, the applicable source code will be provided. A nominal fee may be charged to cover shipping and media. Please direct any source code request to your normal sales or support channel.

# 2. Safety and Regulations

#### 2.1. Warning Levels

Warning signs are provided to prevent personal injuries and/or damages to the product. The following levels are used:

Level of warning	Description	Consequence personal injury	Consequence material damage
	Indicates a potentially hazardous situation	Possible death or major injury	Major damage to the product
WARNING			
	Indicates a potentially hazardous situation	Minor or moderate injury	Moderate damage to the product
CAUTION			
0	Provides information in order to avoid misuse of the product, confusion or misunderstanding	No personal injury	Minor damage to the product
NOTICE			
0	Used for highlighting general, but important information	No personal injury	Minor damage to the product
NOTE			

Table 1. Warning levels

#### 2.2. Safety Information Before installation:

Read this manual completely and gather all information available on the product. Make sure it is fully understood. Check that your application does not exceed the safe operating specifications for the product.

#### SAFETY DURING INSTALLATION

The product must be installed and operated by qualified service personnel and installed into an apparatus cabinet or similar, where access is restricted to service personnel only. For Ibex products, outdoor installation is allowed.

During installation, ensure a protective earthing conductor is first connected to the protective earthing terminal (only valid for metallic housings). Westermo recommends a cross-sectional area of at least 4  $\rm mm^2$ .

Upon removal of the product, ensure that the protective earthing conductor is disconnected last.

#### HAZARDOUS VOLTAGE

Do not open an energised product. Hazardous voltage may occur when connected to a power supply.

#### **PROTECTIVE FUSE**

The power supply wiring must be sufficiently fused.

It must be possible to disconnect manually from the power supply. Ensure compliance to national installation regulations.

#### **POWER SUPPLY CONNECTION**

There are safety regulations governing the power source that can be used in conjunction with the product. Refer to chapter Interface Specifications.

#### **RADIO PRODUCTS**

Observe the usage limitations of radio products at filling stations, in chemical plants, in systems with explosives or potentially explosive locations.

The product may not be used in airplanes. Exercise particular caution near personal medical aids, such as pacemakers and hearing aids. Never perform work on the antenna system during a thunderstorm.

To fulfill human safety, a minimum separation distance of 20 cm or more should be maintained between the antenna of the product and personnel during operation.

#### HOT SURFACE

Be aware that the surface of this product may become hot. When it is operated at high temperatures, the external surface may exceed Touch Temperature Limit according to the product's relevant electrical safety standard.

This product complies with Touch Temperature Limits throughout its operational temperature range.

#### **CORROSIVE GASES**

If the product is placed in a corrosive environment, it is important that all unused connector sockets are protected with a suitable plug, in order to avoid corrosion attacks on the gold plated connector pins.

# CABLE TEMPERATURE RATING FOR FIELD TERMINAL WIRES

There may be a requirement on the minimum temperature rating of the cable to be connected to the field wiring terminals, see chapter Interface Specifications.

#### 2.3. Care Recommendations

Follow the care recommendations below to maintain full operation of the product and to fulfill the warranty obligations:

- Do not drop, knock or shake the product. Rough handling above the specification may cause damage to internal circuit boards.
- Use a dry or slightly water-damp cloth to clean the product. Do not use harsh chemicals, cleaning solvents or strong detergents.
- Do not paint the product. Paint can clog the product and prevent proper operation.

If the product is used in a manner not according to specification, the protection provided by the equipment may be impaired.

If the product is not working properly, contact the place of purchase, the nearest Westermo distributor office or Westermo technical support.

#### NOTE

Devices not used shall be kept in the factory sealed moisture barrier bag. Open, unsealed devices should not be kept unpowered for more than 30 days.

#### 2.4. Product Disposal

This symbol means that the product shall not be treated as unsorted municipal waste when disposing of it. It needs to be handed over to an applicable collection point for recycling electrical and electronic equipment.

By ensuring the product is disposed of correctly, you will help to reduce hazardous substances and prevent potential negative consequences to both the environment and human health, which could be caused by inappropriate disposal.

Figure 1. WEEE symbol for treatment of product disposal

#### 2.5. Compliance Information

#### **REGULATORY NOTICE**

Any changes or modifications shall be approved by the party responsible for compliance. If not, users could void the user's authority to operate the equipment. Country code and antenna gain need to be set properly for correct functionality in the installed country.

2.5.1. Agency Approvals and	Standards Compliance
-----------------------------	----------------------

Approvals and Standards			
Climate	EN 50155, class OT4 Railway applications - Electronic equipment used on rolling stock

	system		

#### 2.5.2. United States - FCC

The enclosed product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (i.) this product may not cause harmful interference and (ii.) this product must accept any interference received, including interference that may cause undesired operation.

To satisfy FCC RF exposure requirements for mobile transmitting devices, a separation distance of 20 cm or more should be maintained between the antenna of this product and persons during operation. To ensure compliance, operations at closer distances than this are not recommended.

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- · Increase the separation between the unit and receiver
- Connect the product into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

#### NOTE

This product contains FCC IDs 2AEJD-103902-DT50RF (WLAN) and XMR201901EM12G (LTE).

#### 2.5.3. United States - AREMA

The product has been tested according to AREMA Part 11.5.1 and 11.5.2 environmental class I and exposure class Internal.

#### 2.5.4. Canada - IC

This product complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

- This product may not cause interference.
- This product must accept any interference, including interference that may cause undesired operation of the product.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

• l'appareil ne doit pas produire de brouillage.

NOTE

• l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This product contains the IC Certification numbers 9301A-103902DT50 (WLAN) and 10224A-201901EM12G (LTE).

#### 2.5.5. Simplified Declaration of Conformity

Hereby, Westermo declares that this product is in compliance with applicable EU directives and UK legislations. The full declaration of conformity and other detailed information is available at www.westermo.com/support/product-support.

CE R

Figure 2. The European Conformity and the UK Conformity Assessment markings

# **3. Product Description**

#### 3.1. Product Description

The Ibex-RT-630 is an EN50155 LTE and WLAN router, developed for demanding industrial and railway applications. It makes full use of the 3G and 4G cellular networks and 2.4 and 5 GHz WLAN bands.

The device utilizes a high performance GNSS receiver with concurrent reception of up to 3 GNSS signals from GPS, Galileo, GLONASS or BeiDou systems.

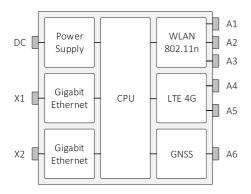

Figure 3. Ibex-RT-630-LV/Ibex-RT-630-HV block diagram

The Westermo configuration management tool, WeConfig, can be used for discovery and basic configuration and maintenance. The configuration can be done via SNMP or via WebGUI. The status information is available in local LED status indicators, and through SNMP/WebGUI.

The Mobile Communication Gateway router is designed to withstand tough onboard environmental conditions and can be remotely managed using web browser or SNMP management tools.

Integrating hardware, software and network design support tools, this router platform offers advanced capabilities, the lowest total cost of ownership and will create the most reliable and resilient networks.

The router is engineered to maintain uninterrupted data communication, even in exceptionally harsh environments. Tested and certified to withstand extreme temperatures, vibrations and shocks, these routers only use industrial grade components which contributes towards a market leading mean time between failure (MTBF), maximized service life, and reduced operational and life cycle costs.

#### 3.2. Available models

Art. no.	Model	Region	PoE Port	Rated current
3623-075001	Ibex-RT-630-LV EU	Europe	X2	24 VDC
3623-075002	Ibex-RT-630-LV NA	North America	X2	24 VDC
3623-075101	lbex-RT-630-HV EU	Europe	-	72-110 VDC
3623-075102	Ibex-RT-630-HV NA	North America	-	72-110 VDC

Table 2. List of available models

#### 3.3. Connector Information

#### 3.3.1. Power Input Connection

Marking	Position	Direction	Description	
DC	1	+DC	Positive terminal	2 1
	2	-		
	3	-DC	Negative terminal	
	4	-		\Jalq/
	Housing	Shield	Chassis of product (ground)	3 4

Table 3. M12 A-coded 4-pin male power connector according to IEC 61076-2-101

#### NOTE

If the product is powered by PoE, the protective dust cap which is part of the delivery must be closed to protect the power interface from water or dust ingress.

#### 3.3.2. SIM Card Slot

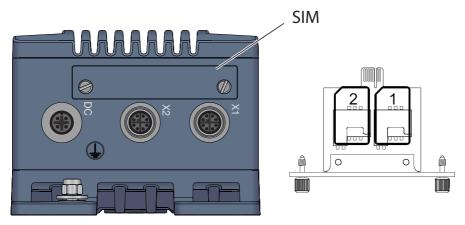

Figure 4. SIM card slot

To remove the SIM card drawer, untighten the two knurled screws until they are loose and not anymore connected to the unit frame. Carefully move the drawer out of the frame. Place the SIM cards into the sockets in slot 1 and/or slot 2 with the contacts facing down. Let chamfered corners align according markings on the drawer.

Put the SIM card drawer back into the unit, ensuring that it fits into place and tighten the knurled screws on both sides until the drawer is fully inserted and plane with the unit frame.

#### NOTICE

To use the device in its specified temperature range it is important to use a robust industrial SIM card with extended temperature range.

#### NOTICE

In order to guarantee proper IP against dust and water, please check carefully that the drawer is fully inserted and screws are properly tightened.

#### NOTICE

Before removing and inserting the SIM drawer, ensure that power has been turned off by removing the power connector from the unit.

The sim cards must be fully inserted into the sockets until the mechanical stop.

#### NOTE

The product supports two SIM cards with the restriction that only one SIM card is active.

#### 3.3.3. Ethernet Ports

The product includes two Ethernet ports X1 and X2 which supports auto-negotiated 10 Mbit/s, 100 Mbit/s and 1000 Mbit/s operation. Automatic MDI/MDIX crossover is supported for 10BASE-T, 100BASE-T, 100BASE-T operation.

Marking	Position	Direction	Description	
X1/X2	1	In/Out	DA+	2 3
	2	In/Out	DA-	
	3	In/Out	DB+	
	4	In/Out	DB-	
	5	In/Out	DD+	
	6	In/Out	DD-	
	7	In/Out	DC-	
	8	In/Out	DC+	
	Housing	Shield	Chassis of product (ground)	

Table 4. M12 X-coded 8-pin female Ethernet connector according to IEC 61076-2-109

Position	Device mode A	Device mode B

2	+DC	
3	-DC	
4	-DC	
5		-DC
6		-DC
7		+DC
8		+DC

Table 5. Ethernet PoE connection on X2 (LV-model only)

PoE is supported on X2 for the LV product variant only.

#### NOTE

If the Ethernet function is not used, the protective dust cap which is part of the delivery must be closed to protect the interface from water or dust ingress.

#### 3.3.4. Antenna Ports

The antenna connectors are identified on the product with A1 to A6. QMA industrial standard connector is used.

A4 and A5 are used for LTE communication. Both antennas ports must be used and connected to external LTE antennas.

A1 to A3 are used for WLAN communication. At least A1 must be connected to an external WLAN antenna. The antenna configuration is made through the software interface.

A6 is used for the included GNSS receiver. The antenna port must be connected to an external GNSS antenna.

#### NOTICE

Any unused antenna ports must be properly terminated with 50 Ohm, otherwise the product might be damaged when power is applied to a non-terminated antenna port.

#### NOTE

To ensure specified IP protection, suitable QMA connectors/cables and terminations must be used.

#### 3.4. LED Indicators

Figure 5. LED indicators

LED	Description	
DC	Power status	
OPR	Operation status	
ERR	Error status	
X1	Ethernet status for X1 port	
X2	Ethernet status for X2 port	

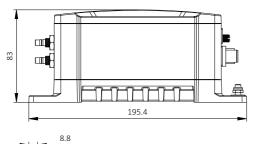

Table 6. LED indicators

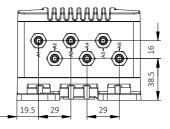

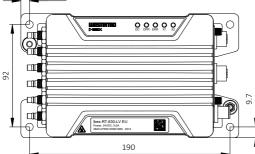

Refer to management guide for detailed LED status indication.

# 3.5. Dimensions

Dimensions are stated in mm and are regardless of variants.

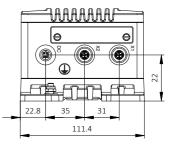

Figure 6. Dimensional drawing

### 4. Installation

#### 4.1. Mounting

The product is fixed with the four fixing points located at the corners of the product. M5 or M6 screws are used for the fixation of the product. The screws are tightened with min. 3.0 Nm (fixing screw ISO 898/1, quality class 8.8).

#### NOTICE

All four specified fixing points must be used for fixing. The installation surface should be flat to have all fixing points connected to the surface.

#### NOTE

For indoor installation, consider additional protection against dust to ensure proper heat dissipation.

#### NOTE

For outdoor installation, consider additional protection against sun radiation, dust and dirt to optimize ambient temperature range.

#### NOTE

Unused connectors must be covered by a protective cap (delivered with the product), tightened to the specified torque in order to fulfill the specified ingress protection code.

#### 4.2. Factory Reset

To reset the product into factory default settings, a reset adapter is needed which is plugged into one of the Ethernet ports X1 or X2 during startup.

Art. no.	Description
3623-0799	Factory Reset Plug, X-coded

#### Factory reset procedure

1. Plug the factory reset adapter to one of the Ethernet interfaces.

- 2. Power the product.
- 3. Wait until factory reset adapter is detected. This is indicated by solid ORANGE OPR LED and RED ERR LED.
- 4. Remove factory reset adapter within 15 seconds.
- 5. Successful initiation of the factory reset is indicated by blinking ORANGE OPR LED and RED ERR LED.

#### 4.3. Earth connection

For correct function, the earth connection at the grounding point needs to be properly connected to a solid ground. An M5 grounding screw at the housing is used for grounding. A short wire with a cross section of at least 4 mm2 shall be used. The grounding wire is set below the rip-lock washer. The nut is fixed for good reliable grounding contact. The tightening torque of the nut shall be 2.0 Nm.

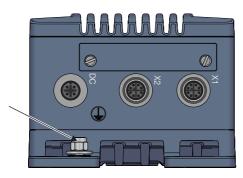

Figure 7. Earth connection

**NOTICE** Do not use equipment without protective earth connection.

#### 4.4. Connection of Cables

Recommended tightening torque for the M12 connectors is 0.6 Nm. All M12 connections are screw connections.

When connecting the power cable, ensure that the pins are connected correctly before tightening the power cable to the unit.

#### NOTE

This product has no replaceable fuse and should be connected via an external fuse for protection.

#### 4.5. Cooling

This product uses convection cooling. Make sure that it is installed so that the ambient temperature is within the specified temperature range, e.g. by avoiding obstruction of the airflow around the product.

It is recommended to install the product in areas where the natural convection airflow is not blocked and that there is enough spacing around the product.

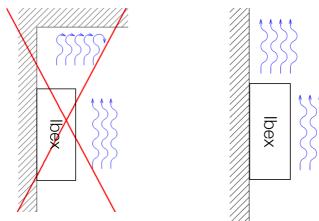

Figure 8. Installation with reduced natural convection airflow

Figure 9. Installation with natural convection airflow

When operating the product at high ambient temperatures, it is recommended to mount the product to a metallic base plate to improve the heat dissipation. The base plate increases the surface to spread the heat.

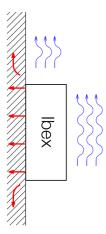

Figure 10. Improved heat transfer based on fixing plate and natural convection

#### NOTICE

Limited air flow is rising the product temperature and may lower the upper limit of the operating temperature range.

#### NOTICE

Temperature is dependent on the operational parameters, like RF output power, amount of traffic.

#### NOTICE

This product has integrated temperature sensors for monitoring the internal device temperatures. If temperature limits are exceeded, alarms are sent through the SW interface.

#### NOTICE

The operating conditions shall be ensured so that the normal operation does not cause temperature alarms. Improve installation conditions or RF parameters in case of any temperature alarms.

#### 4.6. Replacement of Product

Disconnect all cables and unscrew the product from the wall. Mount the replacement product and reconnect all cables, observing the instructions in Connection of Cables.

MTTR (Mean Time To Repair), i.e. time for replacement of product is: < 10 minutes.

#### HOT SURFACE

Be aware that the surface of this product may become hot. When it is operated at high temperatures, the external surface may exceed Touch Temperature Limit according to the product's relevant electrical safety standard.

This product complies with Touch Temperature Limits throughout its operational temperature range.

# 5. Specifications

# 5.1. Interface Specifications

DC, Power port	DC, Power port			
	lbex-RT-630-LV:	lbex-RT-630-HV:		
Connector	M12 A-coded male			
Rated voltage	24 VDC	72 to 110 VDC		
Operating voltage	16 to 30 VDC	50 to 138 VDC		
Rated current	0.6 A	0.2 A		
Rated frequency	DC			
Inrush current	39 mA <sup>2</sup> s at 24 VDC	4 mA <sup>2</sup> s at 72 VDC 13 mA <sup>2</sup> at 110 VDC		
Startup current	2 x rated current			
Polarity	Reverse polarity protected			
Redundant power input	No			
Conductor cross section (flexible)	> 0.5 mm² (AWG 20)			
Cable temperature rating	-40 to +70°C			
Shielded cable	Not required			

PoE (PoE powered product - Ibex-RT-630-LV only on X2)		
Connector	M12 X-coded female	
Device mode	A and B	
Rated voltage	48 VDC	
Operating voltage	37 to 57 VDC	
Power classification	Class 3	

Ethernet TX		
Connector	M12 X-coded female	
Electrical specification	IEEE std 802.3	
Data rate	10 Mbit/s, 100 Mbit/s, 1000 Mbit/s, manual or auto	
Duplex	Full or half, manual or auto	
Transmission range	Up to 100 m with CAT5e cable or better	
Cabling	Shielded cable CAT5e or better is recommended	
Conductive chassis	Yes	

The product is to be connected to internal Ethernet networks without exiting a facility and being subjected to TNVs.

#### NOTICE

To avoid damages on the Ethernet interfaces, ensure that the far end side of the Ethernet cable shield itself is connected to protective earth.

SIM card	
SIM type	Mini-SIM 2FF
Temperature rating Industrial grade	

Antenna WLAN (A1 to A3)		
Connector	QMA female	
Direction	Transmit and receive	
Cabling	50 Ohm coaxial cable and WLAN antenna required	
Conductive chassis	Yes	
WLAN interface	High-power 3x3 MIMO 802.11n Access Point/Client	
WLAN frequency bands	2.400 to 2.4835 GHz, 5.150 to 5.350 GHz, 5.470 to 5.725 GHz, 5.725 to 5.850 GHz	
Transmitting power	Max. conducted combined transmit power within the whole frequency range: 1 port: BPSK16QAM: 22 dBm, 64QAM: 20 dBm 2 ports: BPSK16QAM: 25 dBm, 64QAM: 23 dBm 31 port: BPSK16QAM: 27 dBm, 64QAM: 25 dBm	

#### NOTICE

Depending on the installation country there are frequency/band restrictions and output power limitations.

Connector         QMA           Direction         Transmit and receive           Cabling         50 Ohm coaxial cable and WLAN antenna required           Conductive chassis         Yes           Mobile interface         2x2 MIMO LTE-A Cat 12, 3GPP E-UTRA Release 12           Mobile frequency bands         ETE-FDD: B178/283764785/87/88/89/812/B13/B14/B17/B18/B19/B20/B21/B25 /B26/ B28/B29/B30/B32/B66 (B29 and B32 support Rx only)           LTE-A carrier aggregation         DL 2×CA / DL inter-band 2CA: B1+B3/B5/B18/B19/B20/B21/B26           DL 2×CA / DL inter-band 2CA: B1+B3/B5/B18/B19/B20/B21/B26         B2+B4/B5/B19/B3/B19/B20/B21/B26           B3+B5/B7/B3/B19/B20/B21/B26         B2+B4/B5/B17/B3/B19/B20/B21/B26           B4+B5/B12B13/B17/B29/B30, B5+B7/B25/B130/B66         B7+B20/B32; B25+B26/B41; B29+B30; B37+B64; B19+B21/B29/B30/B5; B14+B30/B66; B27+B20/B28; B12+B25/B30/B65; B14+B30/B66; B27+B20/B28; B12+B25/B30/B5; B14+B30/B66; B3+B5/B17/B3/B19/B20/B21/B26; B2+B26/B41; B29+B30; B3+B46; B19+B21; B3/D1+B17/B29/B30/B5; B14+B30/B66; B7+B20/B38; B12+B25/B30; B3+B46; B19+B21; B20+B32; B25+B26/B41; B22+B30; B3+B46; B19+B21; B20+B32; B25+B26/B41; B22+B30; B3+B46; B19+B21; B20+B32; B3+B46; B19+B21; B20+B32; B3+B43; B4+B4; B7+B7; B25+B25; B38+B38; B39+B39; B40+B40; B4+B2; B3+B3; B4+B4; B7+B7; B25+B25; B38+B38; B39+B39; B40+B40; B4+B2; B3+B3; B4+B4; B7+B7; B25+B25; B38+B38; B39+B39; B40+B40; B4+B29; B3+B3; B4+B4; B7+B7; B25+B25; B38+B38; B39+B39; B40+B40; B4+B29+B30; B3+B47+B30; B2+B12+B30; B2+B2+B30; B2+B2+B24; B3+B3; B4+B4; B7+B7; B25+B25; B38+B38; B39+B39; B40+B40; B4+B29+B30; B5+B6+B2; B13+B6+B2; B5+B30; B2+B2+B30; B4+B259+B30;           DL 2×CA / DL	Antenna LTE (A4 to A5)

Antenna GNSS (A6)		
Connector	QMA	
Direction	Receive	
LNA supply voltage	Max. 3.7 VDC (DC voltage for active antenna)	
LNA supply current	Max. 70 mA (DC current for active antenna)	
Cabling	50 Ohm coaxial cable and GNSS antenna required	
Conductive chassis	Yes	
GNSS receiver	GPS: L1C/A SBAS: L1C/A QZSS: L1C/A, L1 SAIF GLONASS: L1OF BeiDou: B11 Galileo: E1B/C	
Supported GNSS constellations	GPS GPS+Galileo GPS+Galileo+GLONASS GPS+Galileo+BeiDou GPS+GLONASS GPS+BeiDou Galileo Galileo+GLONASS+BeiDou Galileo+BeiDou GLONASS GLONASS+BeiDou BeiDou	
Sample rate	≥ 10 Hz	

#### NOTICE

Unused antenna port must be terminated with 50 Ohm terminations.

#### NOTICE

To avoid damages on the antenna interfaces, ensure that the far end side of the antenna cable and/or the antenna itself is connected to protective earth.

#### NOTE

External GNSS LNA is recommended to improve sensitivity.

### 5.2. Type Tests and Environmental Conditions

Environmental phenomena	Basic standard	Description	Test levels
ESD	EN 61000-4-2	Enclosure	Contact: ±6 kV Air: ±8 kV
Fast transients	EN 61000-4-4	DC power port	$\pm$ 2 kV, direct coupling
		Ethernet ports	$\pm$ 2 kV, capacitive coupling clamp
		Antenna ports	
Surge	EN 61000-4-5	DC power port	L-E: ± 1 kV, 12 <b>Ω</b> , 9 μF, 1.2/50 μs L-E: ± 2 kV, 42 <b>Ω</b> , 0.5 μF, 1.2/50 μs L-L: ± 1 kV, 12 <b>Ω</b> , 9 μF, 1.2/50 μs L-L: ± 2 kV, 42 <b>Ω</b> , 0.5 μF, 1.2/50 μs
		Ethernet ports	L-E: ± 1 kV, 2 <b>Ω</b> , 18 μF, 1.2/50 μs
		Antenna ports	
Power frequency magnetic field	EN 61000-4-8	Enclosure	300 A/m continues, DC, 16.7 Hz, 50 Hz, 60 Hz
Pulsed magnetic field	EN 61000-4-9	Enclosure	300 A/m
Radiated RF immunity	EN 61000-4-3	Enclosure	20 V/m, 80% AM (1kHz) at 80 MHz to 6 GHz 30 V/m, PM 200 Hz square at 380 MHz to 385 MHz 30 V/m, PM 200 Hz square at 390 MHz to 395 MHz 3 V/m, PM 200 Hz square at 104, 136, 165, 200, 260, 330, 430, 560, 715 ±1, 920 ±1 MHz
Conducted RF	EN 61000-4-6	DC power port	10 V, 80% AM (1 kHz) from 0.15 to 80
immunity		Ethernet ports	MHz
		Antenna ports	
Radiated RF emission	CISPR 16-2-3	Enclosure	Class B FCC Part 15 B, Class B
Conducted RF	CISPR 16-2-1	DC power port	Ibex-RT-630-LV: Class B
emission		Ethernet ports	Ibex-RT-630-HV: Class A
Insulation resistance	EN 50155	Power port (DC) to all other ports	> 100 MOhm
Dielectric strength	EN 50155	Power port (DC) to all other ports	Ibex-RT-630-LV: 750 VDC, 60 s Ibex-RT-630-HV: 2250 VDC, 60 s

Table 7. EMC and electrical conditions

Environmental phenomena	Basic standard	Description	Test levels
Temperatures	EN 60068-2-1	Operational	-40 to +70°C (-40 to +158°F) <sup>a</sup>
	EN 60068-2-2 EN 60068-2-14	Storage and transport	-55 to +85°C (-67 to +185°F)
Humidity	EN 60068-2-30	Operational	5-95% relative humidity
		Storage and transport	
Altitude		Operational	2000 m
MTBF	IEC TR 62380		290,000 hours
Vibration	MIL STD 810, M514.7 (sine)	Operational	5 to 10 Hz, 7.62 mm p-p 10 to 200 Hz, 1.5 g 20 sweep cycles in each axis, 0.9 octave/min
	EN 60068-2-64 (random)	Operational, endurance test	11.44 m/s <sup>2</sup> random, 5 to 150 Hz, 3 x 5 h
Shock <sup>b</sup>	EN 60068-2-27	Operational	100 m/s <sup>2</sup> , 30 ms, 3 x 6 shocks (half sine)
	MIL STD 810, M516.7	-	10 g, 11 ms, 3 x 6 shocks (saw tooth)
Weight			1650 gr
Degree of protection	EN 60529	Enclosure	IP66 <sup>c</sup>
Cooling			Convection
Pollution degree	EN 62368-1		PD2
Conformal coating type	IPC-A-610	Electronic modules	AR (Acrylic)

<sup>a</sup>Refer to "Safety and Regulations" chapter regarding touch temperature

<sup>b</sup>The power and Ethernet cables need to be fastened 200 mm or closer to the unit. The same recommendation applies to the Antenna cables.

<sup>c</sup>Provided all connectors are connected with IP66 cabling or fitted with protective caps (delivered with the unit) and tightened to the specified torque

Table 8. Environmental and mechanical conditions

# 6. Abbreviations and Terms

Abbreviation	Description	
3GPP	3rd Generation Partnership Project	
AM	Amplitude Modulation	
AREMA	American Railway Engineering and Maintenance-of-Way Association	
AWG	American Wire Gauge	
BeiDou	Chinese Global Positioning System	
BPSK	Binary Phase Shift Keying	
CAT5e	Category 5 Enhanced Cable	
CE	Conformité Européenne	
CPU	Central Processing Unit	
DC	Direct Current	
EMC	Electromagnetic Compatibility	
EN	European Standard	
ERR	Error	
ESD	Electro Static Discharge	
ETSI	European Telecommunications Standards Institute	
FCC	Federal Communication Commission	
FLOSS	Free/Libre Open Source Software	
Galileo	European Global Positioning System	
GNSS	Global Navigation Satellite System	
GLONASS	Russian Global Positioning System	
GPS	US Global Positioning System	
HV	High Voltage	
IEC	International Engineering Consortium	
IC	Industry Canada	
ID	Identification	
I/O	Input / Output	
IP	Ingress Protection	
ISO	International Standardization Organisation	
LAN	Local Area Network	
LED	Light Emitting Diode	
LTE	Long Term Evolution (4G) Standard for Wireless Broadband Communication	
LV	Low Voltage	

Abbreviation	Description	
MIMO	Multiple Input, Multiple Output	
MTBF	Mean Time between Failure	
MTTR	Mean Time to Repair	
OPR	Operation	
PM	Pulse Modulated	
PoE	Power over Ethernet	
QMA	Quick-connect RF Connectors	
QR	Quick Response	
QZSS	Quasi-Zenith Satellite System	
RF	Radio Frequency	
TNV	Telephone Network Voltage	
SBAS	Satellite-Based Augmentation System	
SIM	Subscriber Identity Module	
SN	Serial Number	
SNMP	Simple Network Management Protocol	
VPN	Virtual Private Network	
WebGUI	Web Graphical User Interface	
WeConfig	Westermo Configuration Tool	
WEEE	Waste Electrical and Electronics Equipment	
WLAN	Wireless Local Area Network	

Table 9. Abbreviations and terms

# 7. Revision Notes

Revision	Date	Change description
Rev. F	2022-09	Old chapter 3.3. Rear Side Label deleted, 3.5 Dimensions, illustration updated
Rev. E	2022-01	3.3.1 Frontside Overview; error in overview corrected
Rev. D	2021-10	(User guide migrated to CMS tool), 2.2 Safety Information; information on cooling moved to chapter 4.5 Cooling, 2.5.1 Agency Approvals and Standards Compliance updated, 3.3.2 Front Side Label; callouts reversed order, 3.5 Led Indicatiors; illustration added, 4.2 Factory Reset moved from old chapter 3.6, 4,5 Cooling; illustrations updated.
Rev. C	2021-06	2.5.5 Europe – Simplified Declaration of Conformity updated text and figure
Rev. B	2020-10	Updated frontpage
Rev. A	2020-06	First revision
